PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years shipping production software for US companies. Deep expertise in **Electron/desktop release engineering** (code signing, notarization, installers, auto-updates, multi-platform CI/CD) plus strong **DX/AI tooling** (Rust MCP servers, guardrails, skills). Solid full-stack breadth in **TypeScript/Node, Python, React, and GCP**.

TECHNICAL SKILLS

Desktop & Release:	Electron.js (code signing, notarization, installers, auto-updates, IPC, security/sandboxing), multi-platform packaging (macOS/Windows), GitHub Actions, release automation, Docker, Terraform
DX & AI:	MCP servers (Rust), guardrails, skills, internal tooling, AI-assisted workflows, developer experience
Languages:	TypeScript, JavaScript (ES6+), Python, SQL, Rust
Backend & Cloud:	Node.js, BFF, REST APIs, Django, Flask; GCP (ACE) — Cloud Run, Pub/Sub, Firestore, Cloud SQL; Datadog
Frontend & Testing:	React, Vue; Jest, Vitest, Playwright, Cypress, Pytest

PROFESSIONAL EXPERIENCE

Dialpad — Remote (US) **Oct 2021 – Oct 2026 (5 years)**
Senior Software Engineer (May 2024 – Oct 2026) • Software Engineer III (Oct 2022 – May 2024) • Software Engineer II (Oct 2021 – Oct 2022)

- Owned **Electron release engineering** for the enterprise desktop app: code signing, notarization, installers, auto-updates, and multi-platform distribution for thousands of daily active users.
- Led **Electron.js** upgrades, security hardening, and performance work; reduced memory and improved crash-free sessions across macOS and Windows.
- Built and maintained **GitHub Actions CI/CD** for multi-platform builds, automated testing gates, and release pipelines.
- Built from 0 **AI tooling in Rust**: MCP servers for chat, backoffice, and an experimental Gemini Live calls integration; guardrails and skills; reverse-engineered internal systems to bridge AI to product APIs. Used daily by support engineering for triage and by the CTO/CPO; adopted by engineers across teams.
- Contributed to **BFF** services (TypeScript/Node, GCP) and observability improvements.

Venmo (PayPal) — Remote (US) | *Backend Software Engineer (Biz Experience)* **May 2021 – Oct 2021**

- Contributed to REST endpoints for business profiles and mobile clients (Python/Django/MySQL); built an API to distribute M3U8/HLS manifests for media playback.
- Proposed DX/tooling improvements; gained exposure to Kubernetes and Datadog.

Briq — Remote (US) | *Senior Full-Stack Developer (ETL)* **Oct 2020 – May 2021**

- Built financial data interfaces (Vue) and Flask microservices (Firestore); improved DX with CI/CD tests, linting, playbooks, and Docker Compose.

Eventbrite — Mendoza, Argentina | *Software Engineer I & Junior* **Aug 2018 – Oct 2020**

- Built full-stack features (Python/Django/PySOA/React) and contributed to the Python 3 migration, service decoupling, and Independent Deployments.

Earlier Career & Teaching — Mendoza, Argentina **2012 – 2020**

- Professor of Software Programming (2013–2020); Full-Stack Developer at Foca Software / independent (2012–2018; PHP, JavaScript, SQL).

OPEN SOURCE CONTRIBUTIONS

- **Traefik** (PR #8107, merged): Node.js LTS upgrade in the WebUI Docker build.
- **AdminLTE** (PR #3645, merged): Docker-based contributor environment (Dockerfile, compose, .dockerignore).
- **Eventbrite PySOA**: fixes for **get_all_paths** empty structures and UTC datetime parsing in test plans (commits).

CERTIFICATIONS, EDUCATION & LANGUAGES

GCP Associate Cloud Engineer (ACE) • Associate's Degree in Systems Analysis & Programming, IES 9-024 • English: Professional Working (6+ yrs US teams) • Spanish: Native
